Subject: MLPAComments: Marine Life and our lives

Dear People who will determine what areas of our central California Coast are protected:

First, let me thank you for what you are doing.

Second, let me urge you to choose that proposal which covers the most areas of the near shore, the most species of ocean life that are in jeopardy from over fishing, pollution and other human invasion. I believe that would be proposal number two, recommended by the Monterey Bay Aquarium.

Third, I urge you to take the long view interests of the ocean itself, of my children and grandchildren and yours and all the others who will be affected by your decisions.

Thank you very much. Sincerely yours,

George M. Wilson, 2852 Forest Lodge Road, Pebble Beach, CA 93953
